

AI attributes corresponds to one of the plurality of healthcare services provided by one of the plurality of healthcare providers; and

linking the website to the database wherein the database is searchable via a search engine wherein the search engine searches the database for specific attributes wherein one of the specific attributes corresponds to one of the pre-defined attributes.

Claim 2 (currently amended): The method ~~for~~ of Claim 1 further comprising the step of:

searching the database for the specific attributes.

Claim 3 (currently amended): The method ~~for~~ of Claim 1 further comprising the step of:

creating an update button on the website for instantly amending the database when the update button is chosen by the healthcare provider.

Claim 4 (currently amended): The method ~~for~~ of Claim 1 further comprising the step of:

storing the pre-defined attributes on the database for recall of the pre-defined attributes for placement on the website.

Claim 5 (currently amended): The method ~~for~~ of Claim 1 further comprising the step of:

A1 networking a plurality of databases for storing the websites.

Claim 6 (currently amended): The method ~~for~~ of Claim 1 further comprising the step of:

accessing the remote server for recalling the website stored on the database.

Claim 7 (currently amended): The method ~~for~~ of Claim 1 further comprising the step of:

adding links to the website for linking other websites relating to other healthcare providers to the website.

Claim 8 (currently amended): The method ~~for~~ of Claim 1 further comprising the step of:

adding one or more photographs, graphics and logos to the website via the remote computer.

Claim 9 (currently amended): The method ~~for~~ of Claim 1 further comprising the step of:

associating the website with one or more practitioners who practice at ~~at~~ least one of a practice, a clinic, a hospital or a healthcare facility.

Claim 10 (currently amended): The method ~~for~~ of Claim 1 further comprising the step of:

creating one or more web pages on the website having information thereon related to the healthcare provider wherein

AI  
the healthcare provider has a practice location.

Claim 11 (currently amended): The method ~~for~~ of Claim 1 further comprising the steps of:

accessing the database via a second remote computer;

searching the database for the pre-defined attributes of the website; and

displaying the website.

Claim 12 (currently amended): The method ~~for~~ of Claim 1 further comprising the steps of:

choosing pre-defined information to add to the website wherein the pre-defined information uniquely identifies the website ~~for searching of~~ to search the website for the pre-defined information.

Claim 13 (currently amended): The method ~~for~~ of Claim 1 further comprising the step of:

adding a plurality of web pages to the website related to the healthcare provider.

Claim 14 (currently amended): The method ~~for~~ of Claim 1 further comprising the step of:

organizing the pre-defined attributes into files for storage within the database; and

searching the files via a search engine for at least one of the pre-defined attributes stored within the database.

A1  
Claim 15 (currently amended): A system for creating websites for healthcare providers, the system comprising including:

a remote server having a database therein wherein the database is accessible by a ~~on a~~ computer network;

a first remote computer connected to the remote server via the computer network wherein a website having a web page is created on the remote server via the remote computer using pre-defined information contained on the remote server wherein the pre-defined information corresponds to one of a plurality of healthcare providers wherein the website ~~relates to~~ identifies ~~a first one of the plurality of healthcare provider providers~~ providing one of a plurality of healthcare services wherein the web page displays the pre-defined information and further wherein the website is stored on the database; and

pre-defined attributes ~~associated with~~ assigned to the website for uniquely identifying the website in the database wherein the pre-defined attributes identify one of the plurality of the healthcare services provided by one of the plurality of healthcare providers.

Claim 16 (original): The system of Claim 15 further comprising:

an update button on the website for instantly amending the website via the remote computer.

Claim 17 (original): The system of Claim 15 further comprising:

A1 an update button on the website for instantly amending the pre-defined attributes contained in the database.

Claim 18 (currently amended): The system of Claim 15 further comprising: a search engine on the remote server for searching the database for the website via the pre-defined attributes.

Claim 19 (original): The system of Claim 15 further comprising: a plurality of databases networked together for storing and accessing the website.

Claim 20 (original): The system of Claim 15 further comprising: a second remote computer wherein the second remote computer accesses the website.

Claim 21 (original): The system of Claim 15 further comprising: links on the website for linking other websites to the website.
